

# The Netherlands open and connected

# The Netherlands open and connected

An actionplan  
for the use of open standards and open source  
software in the (semi-) public sector

# The Netherlands open and connected

Why?

*It is just about time .....*

# The Netherlands open and connected

Our goals:

- Interoperabilit
- vendor indepedent
- competition and innovation

# The Netherlands open and connected

## Preconditions:

- continuity and reliability of our electronic government
- no extra red tape

note:

policy implications for OS and OSS vary

# The Netherlands open and connected

Some key actions:

- comply-or-explain and commit (OS)
- implementation strategy (OSS)
- ODF

# The Netherlands open and connected

Further action on OS  
*to apply is the norm*

- A basic list of OS
- A directive from the PM
- An interoperability framework
- Organisation of support, competence and community
- Observance/ high trust
- ODF

# The Netherlands open and connected

## Policy on open document formats:

- ODF but not exclusive
- reading and saving
- no quantitative targets
- support and community (open doc society)
- due date april 1 2008  
[13 ministries]
- Other public organisations follow ultimo 2008

# The Netherlands open and connected

## Further action on OSS

*OSS is preferred if usage is equally suitable*

- implementation strategies ministries
- as well as for local governments and the semi public sector
- supporting front runners

# The Netherlands open and connected
